MAJOR OBJECTIVE OF THE COALITION:

Provide a forum and working group to find answers and evaluate the diverse, dynamic and individualized nature of energy balance to improve assessment and recommendations to create *healthier Americans*

Attendees will be able to...

Discuss dynamic factors and metabolic variations affecting the individual assessment of energy balance

Introduce the new paradigm of weight maintenance \pm change (loss/gain) into their practice

Utilize new skills and knowledge of EB assessment to make improved recommendations of caloric requirements for weight management, disease prevention, and wellness

Motivate and activate clients to integrate technological advances, education, self-definition and evaluation to improve self-management

Participate in a coalition and mentor club with experts to guide national efforts to improve collaborations and foster new models to improve outcomes

Identify and evaluate new program models to guide innovative practices

Build collaborative pilot research projects & outcome studies
